

Product REVIEW

Benefits of Neem

Learning to alter our daily lives and routine due to the pandemic is something that we are all currently having to do. This is why I have decided to write this review, I was recently asked by a customer what could be recommended to combat the effects on her skin due to the continuous wearing of facial masks.

Before offering a 3 steps guide, I will outline why I have chosen neem products as an option. The neem plant and extract are what is shown in the pictures above.

Neem has many properties but specifically for the skin, its anti-inflammatory properties relieve skin dryness, itchiness and redness thus preventing pimples and blemishes. Neem's natural oil promotes wound healing which keeps your skin healthy.

Step 1: Use the Neem Face wash twice a day, this will remove the excess oil and impurities without over drying your skin.

Step 2: Once a week use the Neem face scrub, this gently removes the imbedded impurities leaving your skin soft, clear and refreshed.

Step 3: Use either the Purifying or Peel Off Neem Face Mask once a week, to regulate excess oil secretion, open your facial pores and allowing your skin to breathe.

Also available for ease, is the Neem facial wipes, which can also be used as a make-up remover.
